

Alert

doc: [Alert](#)

Who

Developer: Gillesm

Ideas for future enhancement (let's make sure code design will support this):

- Not just editing things, but adding as well. I should be able to add individual emails, like in tiki articles (in fact code there should be merged)
- Adding a personal note (text area) "Here is an update my friends"
 - Later to extend with a template for the messages (think mail merge with wiki page)
- mouse-over name to have Full name, picture, etc. (easy to do)
- my friends from tiki-friends.php (who implicitly allow me to write to them)
- Admins should be allowed to add a "group watch" of an item

Bugs

minor: You can't alert group "Anonymous" so it shouldn't be offered in menu.
