

Kanban

See [PluginKanban](#) in [Tiki25](#).

Trello-like Kanban boards let you organize items very effectively. This page aims to discuss potential alternatives to have an equivalent feature/feature-set in Tiki.

Very much like [jQuery Gantt editor](#), all the data would live in trackers, and we just need a GUI to display, and drag and drop.

Bugs & Wishes

Open or Pending

No results for query.

+ Create Item

1. Alternative tools

1.1. Wekan

Wekan is JS-only (meteor.js based)

See: <https://github.com/wekan/wekan> [↗](#)

The open-source Trello-like kanban (built with Meteor) <https://wekan.io> [↗](#)

MIT licensed.

Their labels could sync with our Tiki tags, and items ideally could sync/get-transferred to trackers, etc.

Interesting...

1.2. Taiga

<https://resources.taiga.io/features/5minkanban/> [↗](#)

1.3. Kanboard

Kanboard, is php+js + integrated time tracking app!

Kanboard is not for everybody, it's made for people who want to manage their projects efficiently and simply.

<https://kanboard.net/> [↗](#)

<https://kanboard.net/features> [↗](#)

MIT Licensed.

Plugins for Jabber, Oauth2, Github and Gitlab, [Relationgraphs](#) [↗](#), LDAP, SMS Two-Factor Authentication, [TimeTracking with timers](#) [↗](#) and [manual edition of Time tracking possible](#) [↗](#), ...

See: <https://kanboard.net/plugins> [↗](#)

See also a Tiki demo: <https://doc.tiki.org/DocsTodoKanbanByPriority> [↗](#)

1.4. interact.js

interact.js is a JavaScript module for drag and drop, resizing and multi-touch gestures with inertia and snapping for modern browsers (and also IE9+).

<http://interactjs.io>

<https://github.com/taye/interact.js>

1.5. NextCloud Deck

- <https://github.com/nextcloud/deck>

1.6. Vue-Kanban

Since version 21 vue is also an option.

<https://github.com/BrockReece/vue-kanban/>

1.7. Other alternatives

Interesting list here:

<http://alternativeto.net/software/trello/?license=opensource&platform=self-hosted>

An example: <https://github.com/glfw/glfw/projects/2>
