In 2023 2024, we will set up a 3rd [show server](#)

This will be powered by [Virtualmin](#) [↗](#) and [Tiki Manager Package](#), and it will offer:

- PHP version selector, including PHP 8.x
- A recipe that will be easy to replicate for anyone wanting a similar system
- It will replicate all the still desired functionality from <https://gitlab.com/tikiwiki/tiki/-/tree/master/doc/devtools/tim> [↗](#)
- ~~And we'll make a more generic version of~~
<https://gitlab.com/tikiwiki/tiki/-/blob/master/lib/core/Tracker/Field/ShowTikiOrg.php> [↗](#) ~~(that connects not just to show.tiki.org)~~ done:
