What's new

New features in Tiki 17 are being documented in doc.tiki.org and can be found [here](#) .

Wishlist

Wishlist items categorised as "17.x" and/or "17.x Regression" - status open or pending.

[+ Create Item](#)

Summary

With [PluginPivotTable](#)

Open or Pending blockers and regression

No results for query.

[+ Create Item](#)

Open or Pending errors

No results for query.

Activity Stream

There is no activity to display in this stream.

[Show More](#)

Things that need to be done

Improvement

- Admin pages (option orders and sections)

- Features
- Wiki

Updates

The usual suspects

- jquery
- jquery-ui
- Font Awesome
- Bootstrap

etc

Experimental Branches

Some branches to be merged back into trunk before branching

- [h5p](#)  Done
- [conversejs](#)  for Openfire XMPP integration done for [Tiki18](#) but it's OK.
- [casperjs](#)  for Browser Automation Done
- [Expose IDS](#)  Done
- Hopefully ZF3 if in time Done

~~And then we really should remove all dead experimental branches this time!~~ done by Jonny (good job!)

Other fixes

- Search the database for `TIMESTAMP` fields with default value `0000-00-00 00:00:00` as these break with mysql 5.7+

Discussions

- [Composer Dependencies Revamp](#) done for [Tiki17](#)
- [Datavis Convergence](#) ~~proposal is in discussion for Tiki17~~ No other work is planned for Tiki17. A lot has been done, and some things are clearer and some things still unclear.

Experimental / Unavailable / Duplicate check

Experimental and Unavailable are by nature temporary status. Or an option/preference/feature is underwork, under evaluation or about to be discarded or it is complete and good to be flagged as Basic or Advanced preference.

A review is needed to check and the Experimental / Unavailable and what should be done;

- Changing the flag to Basic or Advanced
- Remove it (or prepare the removal for the next version)
- Keep it as it is with verification to the team working on it they are still willing to complete it

<https://dev.tiki.org/Endangered%20features> 

Candidate for removal (TBD)

- ~~#IE Image Fix (Admin -> Miscellaneous) - Correct PNG images alpha transparency in IE6 (experimental)~~
 - +1 
- ~~Wiki Lingo feature as it is an abandoned project~~

- — jcapture-- [r61759](#) [r61764](#) [r61765](#)
 - TODO: update documentation
- FAQs

There has been discussion about this feature being retired, so keep in mind that normal wiki pages can be used to create and display FAQs.
- Image Gallery

File galleries should be used instead.
- ~~Script and process partially done~~
- More work need to be done (may be overflown in Tiki17)
- HTML pages
 - <https://doc.tiki.org/HTML+Pages> (last page modification is 2010)
- HTML Feed
 - <https://doc.tiki.org/HtmlFeed> not found
- FutureLink-Protocol
- Reports
- [Group Alert](#) vs [Group Watches](#)

Do we need both of (almost) the same ?
- PluginSourceForge

Dev list was pinged 0 answers

Candidate for approval (TBD)

We have also some options, features, etc that are still tagged or placed in experimental section as they are working fine and used by many.

- jQuery Infinite Carousel (experimental at : "tiki-admin.php?page=features#contentadmin_features-interface")
- jQuery Sortable Tables (experimental at : "tiki-admin.php?page=features#contentadmin_features-interface")
